Dear Validere Technologies,

I am writing to express my interest in the co-op program with Validere Technologies. I have read about your posting for a software engineer, and I feel that I would be a great fit for this position..

I am currently majoring in Mathematics with interests and background in Computer Science and programming. In school and through my experiences in unpaid internships, I have gained knowledge and skills in multiple coding languages such as Java, Python, C and HTML. I have also developed a fully functioning book reservation system in Java Spring Framework. I strongly believe that I can use my technical background to contribute to your company.

My current goal is to become a top software engineer with in-depth knowledge and experiences. I am very eager to learn new technology and enjoy taking on new challenges. I personally see myself as a hard-working and fast learner and someone who can adapt to a new environment very quickly. Working as an intern at Validere Technologies will help me gain great work experiences and promote growth, while still using my skillset to make a positive impact on your workplace.

Please review my resume for additional details with regard to my expertise and achievements. I would love to have the opportunity to be a part of your company's growth and success.

Best regards,

Michael Li.
